

HPS

PRODUCT DESCRIPTION

NeoChem HPS guard/sealer is a patented, acrylic polymer that provides a durable, protective finish for polished concrete, terrazzo, cementitious, and marble floor surfaces. NC HPS is clear and UV stable. NC HPS eliminates the need for wax and application of conventional polymeric products. Our patented technology extends the life of polished concrete, terrazzo, cementitious, and marble floors by mitigating damage from traffic, dirt, moisture, and increasing resistance to abrasion.

Use NC HPS to provide a protective layer while enhancing the overall appearance and gloss results.

SHIPPING AND HANDLING GUIDANCE

NeoChem HPS is packaged in plastic pails that are subject to damage if mishandled. HPS pails may be punctured and/or the seal may be broken if handled inappropriately. It is recommended that HPS be stored and transported in temperatures between 40 – 85 degrees Fahrenheit. Do not allow HPS to freeze. After breaking the seal and opening HPS, take care to refasten and secure lid closure to eliminate spillage and evaporation. It is recommended to shake/agitate HPS pails before each use. It is recommended to mark used HPS pails to show the level of product remaining following each use. If evaporation takes place up to 25%, it is acceptable to restore back to marked level with potable water.
